Good example for Bryan County. Our roads as an average are a disgrace, and Bryan County leads the State in Agriculture.

MADE COUNTY \$5400.00.

County Commissioners and County Clerk McCreary made the county an even \$5400.00 recently when they invested \$24,000 which was lying idle in the treasury in that amount of the county's expense bonds, which were issued in 1908 and bought by the State School Land Department. The \$24,000 of bonds in which the sinking fund was invested would have matured in March 1918 and were drawing interest at the rate of 5 per cent per annum. The county thereby gets this interest itself, which in four and a half years that these bonds had to run would have been \$5400.00.

TYPHOID DECREASING

According to statistics compiled in the State Department of Health, the death rate from typhoid fever has decreased from 700 three years ago to 399 for the last year. This has been done through a system of disinfecting places. Campaigns of cleaning the alleys, streets and places where filth may accumulate, screening of the windows and swatting the flies have also contributed to the lessening of the disease.
